UC Evo Line

Interactive Sales Promotions

The New Self-Service Shopping Experience

User-Friendly

Fast, interactive and extremely easy to operate, the touchscreen menu navigation of the UC-GT Evo CT offers your customers the utmost in ergonomics and convenience when choosing products. This means fast, problem-free weighing on the self-service scales – even at peak times – making long checkout lines for your customers a thing of the past.

Innovative Shopping Experience

The UC-GT Evo CT can be strategically integrated into your daily sales promotions when it's not in use for weighing. The splendid touchscreen display can be used as an effective self-service info terminal, displaying text, images, or videos for original product presentations, recipe suggestions or special offers.

Barcode Scanning

The UC-GT Evo CT is available with an optional barcode scanner which can capture the GS1 Databar as well as most other standard barcodes. Barcode scanning virtually eliminates product identification errors and allows the retailer to link multiple vendors to the same PLU, improving support of inventory/category management and traceability initiatives.

State-of-the-Art Design

Slim, elegant, and perfectly formed, the UC-GT Evo CT self-service scale fits perfectly in a modern and contemporary store design. The daily maintenance of the scale is made easy thanks to its durable and easily cleanable surfaces.

UC-GT Evo CT

High-End PC-Based Scale with Touch-Screen Control for Self-Service Areas

The UC-GT Evo CT self-service scale is the perfect choice for retailers wanting to offer their customers maximum convenience from their self-service scales. With its fast Intel Atom processor and large working and hard disk memory space, the scale can also be used to advertise sales promotions on the touchscreen display or as an interactive self-service info terminal when it is not being used for weighing. User-friendly, interactive and highly accurate, the UC-GT Evo CT opens the door to a new level of self-service shopping for customers.

METTLER TOLEDO

- **Visual sales promotions at the point of sale – encourages impulse purchases**
- **Powerful self-service info terminal – for an enhanced shopping experience**
- **Barcode scanning – improved inventory/category management and traceability**
- **Faster payment process – no more weighing at checkout**

For the most stringent demands

The UC Evo Line is the METTLER TOLEDO PC scale family for the most stringent demands. The UC Evo Line supports a wide variety of fresh food. It also supports CPU-intensive applications, such as multi-media sales promotions at the point of sale. The UC Evo Line offers easy network integration and support for third-party applications.
